

# WAX RECOMMENDATION

## Pole Pedal Paddle

Jackson Hole Mtn. Resort, Teton Village, WY

Saturday, March 24

8:30 A.M.

7K Freestyle (Skate or Classic, your call)

1 loop

<https://jhskiclub.org/polepedalpaddle>

**Forecast/Conditions:** Overnight low in the 20s. Chance of snow race day, temperature in the low to mid-30s, approaching 40 by midday. A week of warm weather has fully transformed the snow, expect dirty snow, frozen early, then softening.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red mixed, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green Klister, heat smooth, let cool. Then apply a layer of Nordic Klister Red. Those who choose classic may be best served with mechanical grip (fishscales) or zeros. If using skin skis, see our [skin treatment options](#) for best results.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to [www.TokoVideos.com](http://www.TokoVideos.com).
