

# WAX RECOMMENDATION

## Washington Biathlon Association Race 9

Stevens Pass Nordic Center, 5 miles east of Stevens Pass, WA

Saturday, April 14

10:30 A.M. Zeroing, 11:30 A.M. Race

12.5K Men, 10K Women

Mass start (See website for details)

<http://www.wabiathlon.org>

Forecast/Conditions: Overnight low of 33 rising to 41 by race time with a 50 percent chance of light rain. Snowpack should be adequate but somewhat "late season" dirty.

Glidewax: Apply LF Black, scrape and brush, then apply HF Black/HF Yellow mixed 50/50, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A Universal or warm structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
