9:30 A.M.

Junior Women and U16 Boys 5K, all others 10K

Freestyle technique, Interval start

<https://www.skireg.com/nysef-season-opener0>

Forecast/Conditions: Overnight low 16, temperature at start 24, and rising to 30 for the later races. Transformed snow with fresh powder mixed in, cloudy with little chance of new precipitation on race day.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red for early races, HF Yellow for later races, scrape and brush. Finish by crayoning JetStream Red for early races and HF Yellow for later races, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: Medium grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
