

# WAX RECOMMENDATION

## Bozeman Creek Hill Climb

Bozeman Creek (Sourdough) Trail, Bozeman, MT

Saturday December 29

9 A.M.

6.5K/3.5K, Classic technique

Mass start from Mile 1 marker, Bozeman Creek (Sourdough) Trail

<https://www.bridgerskifoundation.org/events/citizens-cup>

**Forecast/Conditions:** Overnight partly cloudy with low near 10F, temperature at start in low teens. Expect a mix of packed new and old snow. Snow will likely be cold, dry and abrasive.

**Glidewax:** Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Blue, corking between layers. For added kick, apply 1-2 thin layers of GripWax Red before the GripWax Blue.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
