Sunday, December 30

12:30 PM

10K Open/Master Men, 5K Women and all others

Freestyle technique

Interval start

2.5K loop

<https://www.skireg.com/4775>

Forecast/Conditions: Overnight temperature in the mid-40s with a 40 percent chance of light rain. Cloudy skies with the temperature falling steadily through the morning and dropping to 23 by start time. Frozen, packed powder with potential icy conditions.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
