Elm Creek Park Reserve, Maple Grove, MN

Saturday, December 22

8:30 A.M. for 10K, 9:15 5K, Skate

Mass start on a 2.5K course.

Race link [here](#)

Forecast/Conditions: Overnight low of 21, remaining in the low 20s at start. The manmade snow is going through several thaw/freeze cycles and will be dirty, but machine worked the morning of the race. Mostly cloudy, a 20 percent chance of snow with a slight wind from the south.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Regarding the Junior wax restrictions, host Matt from Pioneer Midwest says no restrictions. "Bring what you bring."

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions. Use your white base skis if you have them.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
