

WAX RECOMMENDATION

Winterstart

Bear Basin, McCall, ID

Saturday, December 15

11 A.M.

5K Skate

Mass start

<http://mccallwintersportsclub.org/>

Forecast/Conditions: Overnight low of 22, 27 at start. Cloud cover of 70 percent, a 15 percent chance of new precipitation, 75 percent relative humidity.

Glidewax: Junior Racers (no fluorocarbons): Apply NF Black, scrape and brush, then apply NF Blue/NF Red mixed 1/1, scrape and brush. For those wanting faster skis, apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine linear grind covered by one pass with the Blue Structurite tool after scraping and brushing glide wax and before applying JetStream.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
