11:45 A.M. 24K Classic, 12:30 P.M. 24K Freestyle

Wave Start, 10 minute waves

All point-point courses

www.noquemanon.com

Forecast/Conditions: Friday night a 10 percent chance of snow showers before 1 A.M. Mostly cloudy, with a low around -14F. Saturday partly sunny, cold, and light winds with race temperatures ranging -7F to +3F. Expect fresh lake effect snow to be tilled with recent snowfall, packed and clean for the majority of the course.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax X-Cold depending on race distance, corking between layers.

Structure: A fine linear grind with no additional structure will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
