10 A.M. - 10:20 A.M. 24K

Freestyle and Classic Divisions

Wave starts, single lap courses

<http://minocquawinterpark.org/wolftracks/>

Forecast/Conditions: Friday night mostly cloudy with a low around 8F and light wind. Saturday mostly cloudy, with race time temperature 15-23. Expect the snow temperature to remain cold due to the exceptionally low temperatures in the days leading up to the race.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Blue and GripWax Red, corking between layers. Final layer should be Blue.

Structure: A fine linear grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
