

# WAX RECOMMENDATION

## Ski to the Sun Marathon and Relay

Mazama Corral Trailhead, Mazama, WA

Saturday, January 26

8:30 A.M.

42K, Freestyle technique

Mass start

Mazama to Sun Mountain (see website for details)

<http://www.methowtrails.org>

Forecast/Conditions: Overnight low of 20 at start with temperature predicted to be around 36 at the finish under sunny skies. Snowpack has increased with 12" of new snow on Tuesday night that has been PistenBully groomed. Expect some transformation of the new snow occurring prior to the event.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.  
**\* Relay team members substitute HF Yellow and JetStream Yellow for the final 2 legs.**

Gripwax: NA

Structure: A Universal structure covered by one pass with the Red Structurite tool after ironing JetStream and before brushing out will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
