

# WAX RECOMMENDATION

## Boulder Mountain Tour - Thursday Update!

Harriman Trail, Ketchum, ID

Saturday, February 2

10 A.M.

34K, Skate

Wave start

<http://www.bouldermountaintour.com>

**Forecast/Conditions:** Overnight low of 24 with an 80 percent chance of snow. Expect a few inches of snow falling on race day, with the temperature rising to 35 by early afternoon. Expect clean, damp snow conditions.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. For absolute best skis, if you have HelX 2.0 Red, spray lightly on top of finished ski and go ski (no brush or polish).

**Gripwax:** N/A

**Structure:** Apply 2 passes of the Red Structurite tool after ironing the JetStream but before brushing and polishing it. After the Structurite, then brush out and polish the JetStream.

Wax tip created by Ian Harvey, Toko US Brand Manager since 1999. [Ian@TokoUS.com](mailto:Ian@TokoUS.com)

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
