

WAX RECOMMENDATION

City of Lakes Loppet Skate Races

North Beach on Bde Maka Ska Lake, Minneapolis, MN

Sunday, February 3

9 A.M. 37K Loppet Skate

10 A.M. 21K Puoli Loppet Skate

Both races wave starts, finish at Wirth trailhead

www.loppet.org/events/cityoflakesloppet

Forecast/Conditions: Overnight low of 32, increasing to 40 by the start. Winds from the south at 6 mph and mostly cloudy skies. Slight chance of rain from 6 A.M. Sunday through the finish. Puoli course is almost entirely natural snow course, thin in some areas with leaves in the tracks, while the Loppet adds some hilly areas and the snowmaking trails at Wirth.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Finish by spraying an even layer of HelX 2.0 Yellow, let dry and ski. Do not brush or polish after the HelX application.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
