

WAX RECOMMENDATION

First Chance Race

Vasaloppet Nordic Center, Mora, MN

Saturday, January 5

11 A.M.

5K and 15K Freestyle races

Self-seeded mass start on a 5K course

<http://www.skinnyski.com/racing/PR/vasaloppet20181108.pdf>

Forecast/Conditions: Overnight low of 23 rising to 33 at the start. About 1.5K will be on manmade while 3.5K will be 5 inches of recent snow over a manmade base. Expect the racing surface to begin firm but soften with traffic. Partly sunny with a slight westerly wind.

Glidewax: Apply LF Black, scrape and brush, then apply a 1:1 mix of HF Red and HF Blue, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool followed by one pass of the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
