

WAX RECOMMENDATION

Great Lakes Division JNQ Skate

Boyne Mountain, Boyne Falls, MI

Saturday, February 2

3 P.M.

10K/5K Skate, 30 second interval starts

5K loop of natural snow

<http://nordicskiracer.com/event-details.asp?id=2651>

Forecast/Conditions: Overnight low of 12 with a 10 percent chance of light snow overnight. Temperature at start 30, partly cloudy, packed powder.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Red scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A universal structure covered by one pass with the Red Structurite tool followed by one pass with the Blue Structurite tool after brushing out the glide wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
