

# WAX RECOMMENDATION

## Hinderbinder

Forest Springs Camp, Westboro, WI

Saturday January 19

10:30 A.M. first races.

12K, 24K Classic & Freestyle, & HS & MS Races

Full schedule: [forestsprings.us/events/hinder-binder](https://forestsprings.us/events/hinder-binder)

**Forecast/Conditions:** Expect a race course with a few thin spots, and tracks on most of the course. Friday night low around zero F, with race time temperature in the upper single digits with partly sunny skies and light winds.

**Glidewax:** FOR ADULT RACES: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. FOR HS/MS RACES: Apply NF Blue, scrape and brush, then apply NF Blue, sprinkle on X-Cold Powner, iron in together, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, heat in Nordic Base Klister Green, smooth, let cool. Then apply Nordic Klister Blue, let cool. Cover with 1 thin layer of GripWax Blue, lightly cork.

**Structure:** A fine linear structure covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](https://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](https://TokoUS.com).
