

WAX RECOMMENDATION

Homestake Hustle Citizen's Race

Homestake Lodge at Homestake Pass, Whitehall, MT

Sunday, January 20

9:30 A.M. Start

10K, 3K & 1K distances; Skate & Classic techniques

www.homestakelodge.com

Forecast/Conditions: Overnight slight chance of snow; low around 26. Sunday a slight chance of snow. Temperature at start in the upper 20s. Possibly a mix of new and primarily older transformed snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. For kids, see notes at bottom of page. Substitute NF Red.

Gripwax: Roughen base with 150 grit sandpaper, iron in a **thin layer** of Nordic Base Klister Green, lightly cork smooth, let cool. Then apply 1-2 thin layers of Nordic GripWax Red, corking very lightly between layers. Tip: The GripWax Red will be easier to apply thinly and evenly over the klister base if it is at room temperature. Let the klister harden up just slightly (outside) before applying the Red cover wax. If fair amount of new snow, Nordic Base Wax Green (binder) covered with either straight GripWax Red or possibly Red/Yellow mix may be best.

Structure: A universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
