## Gore Mountain JNQ Classic

North Creek, NY

Saturday, January 19

9 A.M.

5K U20 and younger, 7K Masters/Open

2.5K loop

<https://www.skireg.com/gore-mountain-jnq-classic>

**Forecast/Conditions:** Overnight low of 2F, temperature at start 5F, several inches of fresh snow, machine groomed surface. Cloudy with a slight chance of precipitation during race.

**Glidewax:** Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers.

**Structure:** A fine grind with one pass of the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
