

# WAX RECOMMENDATION

## Potato Cup

Mink Creek Nordic Area, Pocatello, ID

Saturday, January 19

10 A.M.

15K/10K/5K, Skate

Mass start, 3 Laps

[WWW.POKYXC.ORG](http://WWW.POKYXC.ORG)

Forecast/Conditions: Snow/rain mix at end of week. Friday night low of 28, 32 at start with a high of 35. A 30 percent chance of precipitation during the race, 80 percent humidity.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Black mixed 1/1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](http://TokoUS.com) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
