Birkie Start Stadium, Cable, WI

Saturday, January 12

10 A.M. 30K Classic, 2x 15K lap, Mass start

10:15 A.M. 15K Classic, 1 15K lap, Mass start

10:30 A.M. HS and MS races

<http://www.seeleyhillsclassic.com/>

Forecast/Conditions: Overnight low of Friday about 19, expect a firm track of mixed snow with some dirty spots. Temperature at the start will be about 24 with cloudy skies.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green short (in klister zone), cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers. Cover with a thin layer of GripWax Blue for speed, cork smooth.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
