

# WAX RECOMMENDATION

## Spud Chase

Teton Springs Resort, Victor, ID

Saturday, January 26

10 A.M.

24K/12K/6K, Freestyle

<https://tvtpap.org/event/16th-annual-spud-chase/>

Forecast/Conditions: Overnight temperature in the mid-teens, chance of snow overnight. Race time temperature in the mid-20s. A week of snow should yield clean, soft powder.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine structure covered by one pass with the blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
