

# WAX RECOMMENDATION

## Tahoe Rim Tour and Race

North Tahoe High School, Tahoe City, CA

Sunday, January 27

9A.M. Classic, 9:30A.M. Freestyle

26K

Mass start

Point-to-point

<http://www.farwestnordic.org>

**Forecast/Conditions:** Overnight low of 27, temperature at start 32 and a high of 46. Mostly sunny with light East winds. Due to the nature of this race, expect new, transforming, and transformed snow.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, heat smooth, let cool. Apply 1 layer of Nordic Klister Red, smooth and let cool. Then apply 1 layer of Nordic GripWax Red, smooth out but do not cork into the klister.

**Structure:** A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2001.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
