

WAX RECOMMENDATION

TOKO[®]

Sisu Ski Fest

ABR Trails, Ironwood, MI

Saturday, January 12

9:50 A.M 31K, 11 A.M. 15K

Both Skate and Classic

Wave start for both 31K and 15K

<http://www.sisuskifest.com>

Forecast/Conditions: Overnight low is 16 with a 40 percent chance of snow, temperature at start will be 22-25. Expect faster than usual snow for this time of year.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply multiple layers of GripWax Red, corking between layers.

Structure: A universal grind covered by one pass with the Red Structurite tool after brushing will be best for these conditions.

Created by Blaise Sopiwnik, Toko Tech Team member since 2014.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
