Jente Loppet

Hyak Snow Park, Exit 54 I-90, Snoqualmie Pass, WA

Sunday, February 10

9 A.M.

10K/5K/2.5K, Freestyle technique

Wave starts

2.5K loop

<http://www.snoqualmienordic.com>

Forecast/Conditions: A cold week ending with 6" or more of new snow through Saturday. Low Saturday night is predicted to be around 13. Snow temperature at race time should be around 15 with a slight chance of snow during event.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A fine linier structure or creating one with a single pass with the Blue Structurite tool after applying JetStream and prior to brushing will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
