Cabin Creek Exit 63, Hwy 90, Snoqualmie Pass, WA

Saturday, February 9

9:30 A.M.

15K/5K, Freestyle technique

Wave start, 5K loop

See website for further details

<http://www.kongsbergers.org>

Forecast/Conditions: With up to 6" of new snow expected on Friday through the race start, expect clean and softer snow conditions. Friday night low expected around 17 with race time snow temperature to be around 19. Snow likely during the event.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Juniors competing in the Washington Cup adhere to the No HFs or topcoats rule.

Gripwax: NA

Structure: A fine linier grind or creating a linier structure with one pass with the Blue Structurite tool after ironing JetStream and prior to brushing will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
