

WAX RECOMMENDATION

Kongsbergers Ozbaldy

Cabin Creek Exit 63, I-90, Snoqualmie Pass, WA

Sunday, March 3

9 A.M.

50K and 10K Freestyle technique

Mass start by distance

50K is 5 laps

<http://www.kongsbergers.org>

Forecast/Conditions: Saturday night low of 17 with snow temperature expected to be around 20 at the start. Air temperature could reach 32 by race completion under mostly sunny skies. Firm mostly non-transformed snow conditions firmed up by back-to-back race day grooming.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A fine or universal structure covered by one pass with the Red Structurite tool after ironing JetStream and prior to brushing will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
