Wednesday, February 13

1 P.M. Boys Relay, Mass start

2 P.M. Girls Relay, Mass start

4 x 3K Relay (2 legs Classic then 2 legs Freestyle)

Race link [here](#)

Forecast/Conditions: Overnight low of 8F rising to 16 for the start. Partly sunny with mild wind from the west. A 90 percent chance of snow on Tuesday then becoming windy early Wednesday morning. Expect the race course to be in excellent condition.

Glidewax: Apply LF Black, scrape and brush, then apply a 1:1 mix of HF Blue/HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply additional layers of Nordic GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Blue Structurite tool for Skate and Red Structurite for the Classic race (each before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
