Sunday, February 10

11 A.M. Men, 11:10 A.M. Women

6K Classic, then 6K Skate

Mass start

2K loop

<http://mansfieldnordic.org>

Forecast/Conditions: Saturday overnight low about 1F, snow temperature at start in the low teens, sunny. Old refrozen snow, PistenBully ground and packed track.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, heat in a thin layer of Nordic Base Klister Green, let cool. Warm ski until klister is tacky and apply a thin layer of Nordic Klister Blue and smooth. Cover with 1 layer of Nordic GripWax Blue and cork smooth if there is some new snow in the track.

Structure: A fine structure covered by one pass with the Blue Structurite tool (after JetStream application) will best suit these conditions.

Created by Dave Boucher, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
