

WAX RECOMMENDATION

Vasa Freestyle Race

Timber Ridge, Traverse City, MI

Saturday, February 9

8:30 A.M.

50K/12K/6K, Freestyle, Wave starts

50K/12K/6K loops

<http://www.vasa.org>

Forecast/Conditions: Overnight low of 7F, temperature at start of 8F rising to 14 by noon. Expect packed powder snow, mostly cloudy skies and a 50 percent chance of snow overnight.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A universal structure covered by one pass with the Blue Structurite tool after brushing out the glide wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
