Saturday, January 9

10 A.M. for kids, about 10:20 A.M. for adults

10K Classic race

2 laps on a 5K loop, Wave starts

Race link [here](#)

Forecast/Conditions: Overnight low 13. Temperature at start in the low to mid-20s and cloudy. Expect fresh, clean, untransformed snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 thin layers of Nordic GripWax Red, corking between layers. If skis feel draggy, apply a very thin cover layer of Nordic GripWax Blue to speed them up.

Structure: A universal stonegrind will best suit these conditions covered by one pass with the Blue Structurite tool before JetStream application.

Created by Barry, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
