

WAX RECOMMENDATION

Moose Chase

Trail Creek Ranch, Wilson, WY

Saturday, February 16

10 A.M.

30K/15K/5K, Freestyle

<https://jhsclub.org/moosechase>

Forecast/Conditions: Overnight low mid-teens, low 20s by midday. Holy blizzard, Batman!! A solid week of snow has fallen in Jackson Hole, so expect soft tracks. Choose ski flex accordingly, and bring poles with baskets that are medium diameter. It will be a glorious day to ski Trail Creek's challenging course.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
