

# WAX RECOMMENDATION

## Owl Creek Chase

Snowmass, CO to Aspen, CO

Sunday, February 10

9 A.M. Start

21K Point-to-Point race. (Shuttle available).

<http://www.aspenspecialevents.com/owl-creek-chase/>

Forecast/Conditions: Overnight low 11, temperature at start 16, clean, dry snow. Sunny and warming to 25. This course is famous for cold, dry snow in the first half. Ample snow for road crossings.

Glidewax: Apply LF Black/LF Blue mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax X-Cold, corking between layers.

Structure: A fine grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
