

WAX RECOMMENDATION

Oosik Classic - Updated!

Mile 11 gravel pit, Talkeetna, AK

Saturday, March 16

Noon

50K and 25K Classic

One loop course

Mass start with 50K first followed by 25K

<https://www.denalinordicskiclub.org/oosik-ski-race/>

Forecast/Conditions: Friday night cloudy with a chance of snow, low in the low to mid-20s. Saturday cloudy, slight chance of snow in the morning, scattered rain showers in the afternoon. High in the mid-30s. The snow has gone through a couple of freeze/thaw cycles and will be coarse and transformed.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, cork smooth, let cool. Check at the Toko tent near the start for the latest grip wax/klister recommendation.

Structure: A universal structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Created by Patrick McGownd, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
