12.5K Men, 10K Women

Individual start

See website for details

<http://www.wabiathlon.org>

Forecast/Conditions: Some midweek snowfall should provide cleaner new snow for grooming. Friday night low of around 16 rising to race time snow temperature around 24 under mostly sunny skies. Daytime high of around 27 is predicted.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Washington Cup participants adhere to the No HFs or topcoats rule.

Gripwax: NA

Structure: A fine or universal structure covered by one pass with the Red Structurite tool after ironing JetStream and prior to brushing will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
