

WAX RECOMMENDATION

Cloquet City Meet

Pine Valley, Cloquet, MN

Sunday, March 10

Start after jump competition, approximately 1:45 P.M.

5.5K Freestyle. Classic tracks will be set

Mass start, single loop

www.skinnyski.com/racing/display.asp?Id=46962

Forecast/Conditions: Overnight low of 22 rising to 32 by race time. Chance of snow between noon on Saturday and noon on Sunday ranges from 60-100 percent. Overcast and windy starting noon on Saturday. Expect a solid racing platform covered with fresh snow and some debris in the course due to the wind.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply additional layers of Nordic GripWax Red, corking between layers. If using skin skis, see our [skin treatment options](#) for best results.

Structure: A universal structure covered by one pass with the Red Structurite tool followed by a single pass of the Blue tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
