

WAX RECOMMENDATION

The Great Ski Race

Tahoe Cross-Country Ski Area, Tahoe City, CA

Sunday, March 3

9 A.M.

30K, Freestyle

Wave start

Point-to-point; Tahoe City to Truckee

<http://thegreatskirace.com>

Forecast/Conditions: Overnight low of 30, temperature at start 32. Up to 10" of snow and windy on Saturday. Windy with light rain/snow showers expected on race day.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Yellow mixed 1:1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Red and GripWax Yellow alternating and corking between layers.

Structure: A universal structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2001.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
