# TOKO<sup>®</sup>

## Bring Back Biathalon

Jug Mountain Ranch, McCall, ID

Saturday, March 9

11 A.M. Training, 2:30 P.M. Race

4K, Skate

Mass start

1 Loop Relay

Forecast/Conditions: Rain/snow mix throughout week. Overnight low of 16 rising to 27 at start at holding through the event. Transformed and clean snow, 50 percent cloud cover.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Yellow mixed 1:1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
