

# WAX RECOMMENDATION

## 2019 Lake Placid Loppet

Mt. Van Hoevenberg, Lake Placid, NY

Saturday, March 16

9 A.M. Classic, 10:30 A.M. Freestyle

25K and 50K

Mass start, 25K lap

<https://www.skireg.com/4675>

**Forecast/Conditions:** Temperature overnight in the mid- to upper 30s falling to 28 by start time. Light wind with a 50 percent chance of snow during the race. Machine groomed, transformed snow.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, hot iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen kick zone with 150 grit sandpaper. Testing required Saturday A.M.

**Structure:** A wet structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
