Sunday, March 10

9 A.M. Daylight Savings Time begins!

50K, 25K, 10K, Classic

Mass start by distance

Loops

More info [Here](#)

Forecast/Conditions: Luckily, the wind will die down from Saturday. Saturday night low of 4F. Race start air temp of 17 warming to mid-20s by race end under mostly cloudy skies and a slight chance of snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1:1, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 thin layers of Nordic GripWax Red covered with a thin layer of GripWax Blue, corking between layers.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
