

# WAX RECOMMENDATION

## Washington Biathlon Association Race 10

Stevens Pass Nordic Center, 5 miles East of Stevens Pass, WA

Sunday, April 14

10:30 A.M. Zeroing, 11:30 A.M. Race

BBQ and Fun Event

Mixed Relay (see website for details)

<http://www.wabiathlon.org>

**Forecast/Conditions:** Overnight low of 31, predicted to rise to around 41 by race time. An 80 percent chance of moisture falling during the event with soft snow conditions.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Black, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** NA

**Structure:** A warm structure on a soft shoveled ski covered by one pass with the Yellow Structurite tool after ironing JetStream and before brushing will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
