

WAX RECOMMENDATION

Tom's Race

Bear Valley XC, Bear Valley, CA

Saturday, April 6

10 A.M.

10K, Classic only

Mass start

2 laps

<http://bearvalleyxc.com>

Forecast/Conditions: Overnight low 28, temperature at start 34, high of 45. New snow on Saturday continuing into Sunday morning. Mostly cloudy with light winds.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Red/GripWax Yellow alternating, corking between layers. Finish with GripWax Red.

Structure: A fine structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2001.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
