

WAX RECOMMENDATION **TOKO**[®]

Hayward Dash

American Birkebeiner Trail, Start Line, Cable, WI

Saturday, December 28

10 A.M. H.S./College Sprint Qualifier; M.S. (1.1K)

11 A.M. H.S./ College Heats; M.S. (1.1K) Heats

1.5K, Classic

Every skier skis a qualifier then three heats

<http://Birkie.com>

Forecast/Conditions: Overnight low of 20, start temperature 27. Snow is icy with fresh tilling, expect a wintry mix of snow and rain, with an 80 percent chance of new precipitation.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit in a warm room for at least one hour (overnight is best), then polish with the Polishing Brush Liquid Paraffin. Note: HS/MS skiers are limited to Performance waxes.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 1 layer of Nordic Klister Red/Klister Blue mixed 1:1. Cover with 3 layers of GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
