

WAX RECOMMENDATION **TOKO**[®]

Skadi's Chase

Elm Creek Park, Maple Grove, MN

Saturday, December 7

8 A.M.

8K, Freestyle, Mass start

3+ laps of the 2.5K course

www.threeriversparks.org/index.php/page/minnesota-nordic-ski-opener

Forecast/Conditions: Overnight low of 17 rising to 22 at the start. Expect transformed snow due to temperature at or above 32 and exposure to sun on days before the event. Race course will be packed, firm to start but soften during laps 2 and 3 from heavy traffic. Softening should not be enough to affect ski selection. A sunny day with a slight wind. Little chance of precip between now and Saturday.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit for 30 minutes, polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
