

WAX RECOMMENDATION **TOKO**[®]

Spooner Holiday Dash

Spooner City Trails, Spooner, WI

Friday, December 27

10 A.M.

3.5K middle school/6.5K high school, Skate

<http://www.railsontrails.org/events/spooner-holiday-dash/>

Forecast/Conditions: Overnight low of around 22 with cloudy skies. Temperature at the start expected in the mid-20s with cloudy skies and winds 5 - 10 mph. Expect a hard/icy base from several days of above freezing temperatures leading up to the event.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush, then apply Base Performance Red Hot Wax, scrape and brush. For BP Liquid Paraffin, apply Base Performance Blue Hot Wax, scrape and brush, then spray on BP Liquid Red, let sit for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying BP Liquid will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
