

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Betty Woolsey Classic**

Trail Creek Ranch, Wilson, WY

Saturday, December 28

10 A.M.

12K/5K/2K, Classic technique

Mass start

[JHSkiClub.org/nordic](http://JHSkiClub.org/nordic)

**Forecast/Conditions:** Overnight low in the single digits, temperature at start around 10F. Dry, packed fresh powder tracks.

**Glidewax:** Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Blue, let sit in a warm room for at least one hour (overnight is best), then polish with two passes with the Base Brush Copper.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply several thin layers of Nordic GripWax Blue, corking between layers.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
