Saturday, December 14

First race starts at 10 A.M., last race at 3:30 P.M.

Freestyle, mass starts, distance varies by class

<https://www.spiritmt.com/cxc-cup-opener>

Forecast/Conditions: Several inches of new snow are expected between now and Saturday, with an 80 percent chance of snow Friday evening and 40 percent throughout the races. The temperature will drop throughout Friday night, from mid-20s to 16 at the start and stay in the mid-teens throughout the day. Wind from the NW expected to gust up to 20 mph, dropping wind-chill to zero. Mostly cloudy. Expect the course to be packed, with wind-blown on open areas and a little soft in the woods.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, sprinkle on X-cold Powder, iron in together, scrape and brush.

Structure: A cold grind without additional hand structure will best suit these conditions. For skis with a universal grind cover with one pass with the Blue Structurite tool after scraping and brushing final hot wax.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
