

WAX RECOMMENDATION

Pre-Nationals CXC Jr/Youth Cup

Michigan Tech Nordic Ski Trails, Houghton, MI

Saturday, December 21

9 A.M. Qualification, 10:35 A.M. to 3:30 P.M. Heats

1.5K/800m Freestyle Sprint

michigantechrecreation.com/trails/Ski_Races/index_cxc%20

Forecast/Conditions: Friday night and early Saturday morning, a chance of flurries before 1 A.M. Mostly cloudy, with a low around 24. Saturday partly sunny, temperature 26-28 for qualification and 29-34 for heats. Expect machine worked and packed powder to be relatively dry.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Black Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit for 30 minutes, polish with the Polishing Brush Liquid Paraffin.

Structure: A fine structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
