

WAX RECOMMENDATION

Gore Mountain JNQ Classic

Gore Snow Bowl, North Creek, NY

Saturday, January 18

9 A.M.

Masters Men/Women 7K, all others 5K, Classic

Interval start

Multiple lap race

<https://www.skireg.com/gore-mountain-jnq-classic>

Forecast/Conditions: Overnight low zero F, temperature at start 8F. Fresh powder with manmade snow tilled in. Cloudy skies, with the arrival of heavy snow after noon.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Blue, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers. This is an initial recommendation, and should be tested.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
