

WAX RECOMMENDATION

Gore Mountain JNQ Skate

Gore Snow Bowl, North Creek, NY

Sunday, January 19

9:30 A.M.

U-16 Boys and Girls 6K, all others 10K, Skate

Mass start

Multiple lap race

<https://www.skireg.com/gore-mountain-jnq-skate>

Forecast/Conditions: Overnight low 20, temperature at start 29.

Fresh, packed powder, machine groomed surface. Snow falling throughout the morning.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax/High Performance Yellow Hot Wax mixed 1:1, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on High Performance Liquid Yellow, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Structure: A medium structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
