

WAX RECOMMENDATION

TOKO[®]

Racing - Service

Race for the Diamonds

Ponderosa State Park, McCall, ID

Saturday, January 4

6 P.M.

5K Team Relay, Skate

Mass start

<http://mccallwintersportsclub.org/>

Forecast/Conditions: New snow throughout week, Friday night low of 30, Saturday high of 31 with a start temp of 25. Course will be well skied-in. Expect soft and mostly untransformed snow. An 80 percent chance of precipitation on Saturday with 80 percent humidity.

Glidewax: Juniors: Apply Base Performance Red Hot Wax, scrape and brush. For those wanting faster skis, apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For High Performance Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on High Performance Liquid Red, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
