

WAX RECOMMENDATION

Re-Mastered

Ponderosa State Park, McCall, ID

Saturday, January 18

10 A.M.

45K, 30K, 15K, Skate

Mass start, 3 Laps

mccallnordic.com/racing/remastered/race-information/

Forecast/Conditions: New snow throughout the week, overnight low of 20, 23 at start rising to 29, 90 percent cloud cover, 50 percent chance of snow and 90 percent humidity. Snow should be clean. Expect course to soften as race progresses.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For High Performance Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit for 1 hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions. A medium to soft flex ski will work best.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
